| Step                                  | Description                                                                                                                   | Why It Matters                              |
|---------------------------------------|-------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|
| 1. Licensed Evaluation                | A certified clinician reviews your mental and physical health through an in-person or telehealth appointment.                 | Ensures medical appropriateness.            |
| 2. Prescription Verification          | If appropriate, the clinician sends an e-prescription through a <b>DEA-approved electronic system</b> to a licensed pharmacy. | Prevents tampering or fraud.                |
| 3. Pharmacy Confirmation              | Pharmacists verify dosage, interactions, and patient identity before the medication is released.                              | Guarantees safety and compliance.           |
| 4. Secure Fulfillment & Quick Transit | The pharmacy prepares your medication for <b>verified pickup</b> or <b>tracked, overnight courier delivery</b> .              | Provides speed without compromising safety. |

This combination of **clinical oversight** and **digital coordination** ensures that access remains both **fast and lawful**.
